# HENDERSON'S FAMOUS ASTERS

## Command the Highest Prices in the Cut Flower Markets

### HENDERSON'S INVINCIBLE ASTERS

*See No. 2 on Front Cover*

**Immense Flowers—Ideal Form and Colors—Long Stems—Vigorous Branching Plants—The Highest Development in Asters.**

Henderson's Invincible are a superior race in every way. The plants are of healthy, robust, branching growth, about 2 feet high—and under best culture often 3 feet—producing, on long stems, massive Chrysanthemum-like flowers of perfect form and graceful outline, exceedingly double to the very center. The flowers are the most beautifully formed of all large Asters. When well grown the flowers of Henderson's Invincible Asters average 3½ inches across; 4-inch flowers are quite common, if grown especially for cut flowers and the side branches pruned, allowing a plant to carry not over 8 or 10 flowers, one flower to a stem. We have received many enthusiastic letters of praise from patrons who have been fortunate enough to capture prizes with them at local exhibitions, flower shows, etc.

### HENDERSON'S GIANT COMET ASTERS

Also known as *Astermum, Crego and Ostrich Plume Asters*

They are a highly developed American type of the German Comet, or Mammoth Ostrich Plume Asters and are far superior to imported strains. The flowers are of immense size, 4 to 5 and often 6 inches across, composed of long, wavy, twisted petals, gracefully formed into loose, yet densely double half globes, equaling some of the finer Ostrich Plume Chrysanthemums.

### IMPERIAL or "Daybreak" ASTERS

#### THE BEDDING ASTER PAR EXCELLENCE

These comparatively new Asters—made in America—are Mid-summer flowering varieties, healthy and vigorous in growth, of upright bushy habit and very profuse bloomers—veritable bouquets of flowers—and in consequence are unrivaled for bedding. The flowers—borne on good, long, stiff stems—are so very double as to appear almost like balls. The petals, short and narrow, are slightly folded and of durable lasting substance. While splendid as cut flowers, it is the bedding Aster—par excellence—for our American climate and conditions.

## HENDERSON'S ANTIRRHINUM

## Tall Giant Flowering

See No. 1 on front cover

These modern hybrid Antirrhinums have been elevated by popular favor from the "Snap-dragon" rank of common flowers to a higher level. ## ARCTOTIS GRANDIS

## A Beautiful New Annual from Southwest Africa

A valuable cut flower for florists for greenhouse or outdoor culture.

The large pearly white, Marguerite like flowers are borne on long stems well above the foliage. The petals are white on the upper surface and pale lilac on reverse and in the center of the flower is a light blue disc surrounded with white stamens and a narrow golden band.

Seen in the bright sunlight a very charming effect is produced as the white petals contrast beautifully with the blue disc and the stamens. Very good for cutting. The plant is of branching habit and forms a clump two to three feet high; when in flower the entire bush seems to be covered with white down producing a very striking effect. *Pkt. 10c., 1000 seeds, 25c., oz., \$1.00.*

## BELLIS or DOUBLE DAISY

Greatly improved varieties of the popular "Double Daisies." Adapted for edgings, borders and low beds, and also well suited for growing in pots. ## HENDERSON'S MAMMOTH BUTTERFLY PANSIES

This "Butterfly" race originated with Mr. Peter Henderson—who was particularly fond of pansies and could be seen almost any morning during "pansy season" walking around the beds—and through his pansy trials from the best American, English, Scotch, French and German pansy specialists. A boy with trowel and "hat" followed and lifted any plant indicated by Mr. Henderson—which meant that it fulfilled all of his expert and critical requirements and was to be transferred to the "Butterfly" bed and associate with the "quality" pansies—the best from all over the world. This process of selection and elimination has been persisted in by us ever since, and from the legion of "most beautiful" pansies among Henderson's Butterflies we have chosen this offering.

**Henderson's Mammoth Butterfly Pansies in Mixed Colors.** *Pkt., 15c.; Per 1,000 seeds, 50c.; Per oz., \$6.00*

### New Early Flowering Double Crested

We have now developed a new, perfect and glorified Cosmos, an early flowering, double type. It is of incomparable grace, beauty and refinement.

These "Ever-flowering Primroses" are favorite pot plants for house and conservatory. The Chinese Primroses will have to look to their laurels, for this new giant Obconica race is looming up in size of flowers, many of them measuring  $1\frac{1}{2}$  inches across, equaling in dimensions those of their Chinese rivals, with the added merit of being easier grown and having a longer duration of bloom. Several colors in mixture, white, crimson, rose, violet, lilac, pink-eyed sorts, etc. (See engraving). Pkt., 25c. Per 1,000 seeds, \$1.00.

For other Primulas, see page 12.

### SALVIA or SCARLET SAGE

Bonfire. Very compact oval bushes, 2 feet high; brilliant scarlet flowers. The spikes stand out stiff and erect; over 200 spikes to a plant is not unusual, and the spikes bear from 20 to 30 flowers each.

Pkt., 10c.; Per 1,000 seeds, 50c.; Per oz., \$3.00

Scarlet Dragoon. A most magnificent summer and autumn-flowering bedding plant. The old *Salvia Splendens*, or Scarlet Sage, has long been a favorite, and our customers can partially appreciate the superiority of this new variety when we state that the flowers are nearly double the size, closely crowding the immense spikes that often measure 6 inches across. Full-grown plants in bloom form compact bushes 3 feet through by 3 feet high, and bloom from ground to summit. Pkt., 15c.; Per 1,000 seeds, 50c.; Per oz., \$3.00

Splendens. The old favorite bedding variety so extensively grown.

Pkt., 10c.; Per 1,000 seeds, 35c.; Per oz., \$2.00

Tom-Thumb Zurich. Of dwarf, compact growth, forming oval bushes 15 to 18 inches high, thickly studded with fine spikes of scarlet flowers. For bedding it is brilliantly effective.

Pkt., 15c.; Per 1,000 seeds, 60c.; Per oz., \$5.00

## Stocks, "Beauty" or "Giant Nice"

*See No. 4 on Front Cover*

They do not flower as quickly from seed sowing as Ten-week Stocks, the "Beauties" requiring from 12 to 15 weeks, but after they commence blooming their long-continued profusion is phenomenal. Seeds started early in the spring in a hotbed, or greenhouse and the seedlings transplanted in the garden in May will begin flowering in July and continue to bloom until frozen. Late sown plants if carefully lifted and potted in the fall will continue to flower beautifully in window garden or conservatory during the winter, though when grown especially for winter flowering—for which "Beauty" Stocks are peculiarly adaptable it is better to sow the seeds in July or August. As cut flowers "Beauty" Stocks are unsurpassable, their splendid trusses of bloom lend themselves to table and other floral decorations and the fragrant flowers are of lasting substance. (See engraving.)

Almond Blossom. White suffused carmine rose. Madame Rivoire. Double white. Beauty of Nice. Exquisite flesh-pink. Queen Alexandra. Rosy-lavender. Crimson King. Brilliant velvety crimson. Rose of Nice. Carmine-rose. Light Violet. Extra fine. Sunburst. Bright sulphur-yellow. Price for any of the above, Pkt., 10c.; Per 1,000 seeds, 40c.; Per oz., \$2.50. Mixed Colors ..... Pkt., 10c.; Per 1,000 seeds, 35c.; Per oz., \$2.00

# NEW GIANT EARLY FLOWERING SPENCER SWEET PEAS.

## BLOOM FOUR WEEKS EARLIER THAN THE LATE SPENCERS

The plants of this new race, grown under congenial conditions, are of strong constitution, vigorous growth, profuse and bloom continuously for about four months. Grown in the open ground they begin flowering in about 106 days from seed sowing or fully four weeks sooner than late flowering Sweet Peas sown at the same time, and they continue to flower in profusion for fully 4 months. It is predicted by Sweet Pea authorities that this race will supplant all other early and late flowering Sweet Peas for winter flowering under glass, and also for open ground culture in our Southern States—sown preferably in fall or winter.

## STANDARD VARIETIES AND NOVELTIES.

The characteristics of the Spencer Sweet Peas, grown under congenial conditions are: robust growth, the plants attaining a height of from 6 to 10 feet, requiring for full development to be not less than 6 inches apart; a foot apart is better.
